### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-3, 7-19, and 35, drawn to compositions for use as an adhesive;

Group II, claim(s) 34, drawn to a food product having a gelling agent;

Group III, claim(s) 4-6, and 20, drawn to a method of forming an adhesive;

Group IV, claim(s) 21-33, drawn to a method for binding substrates together; and

Group V, claim(s) 36-38, drawn to a kit for manufacture of an adhesive.

The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special technical feature in all groups is the use of extensin protein as a component in the manufacture and use of various types of adhesives. This element cannot be a special technical feature under PCT rule 13.2 because the element is shown in the prior art. US Patent 5,443,855 (Wolf et al., 1995, IDS) teaches the use of extensin protein for its adhesive property in the manufacture of cosmetic and pharmaceutical compositions as claimed in

Art Unit: 1651

instant claims 1-38. The reference specifically suggests the adhesive properties of native extensin proteins from plant extracts that can be used for various purposes. The instant claims do not make a contribution over the prior art. Therefore, based on this lack of a special technical feature, restriction for examination purposes is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
